

## **A LEVEL DANCE**

Students will demonstrate their ability to draw together their knowledge, skills and understanding to provide original practical responses and provide short and extended written responses. The course requires students to develop a broad and deep understanding of the connections between the knowledge, understanding and skills. Students are required to demonstrate their understanding of the relationships between theory and practice and the ways in which dancers and choreographers make and implement artistic decisions.

The A Level Dance course encourages students to develop:

- their knowledge, understanding and experience of performance, choreography and appreciation of dance as an art form. This will be achieved through exploring and making connections between theory and practice, critically engaging in the analysis of their own work and that of professional repertoire, leading to a holistic approach to the study of the subject.
- the necessary skills as a performer through the areas of technical training and performance development.
- the necessary skills as a choreographer through further experimentation and application of choreographic and structuring devices.
- the necessary skills to engage in critical enquiry about the art form through the areas of written communication, reflection, analysis and evaluation.
- the necessary awareness of safe practice.
- their artistic and historical knowledge of dance in the wider cultural context.
